*The Thanksgiving Address of the Haudenosaunee* is much more than a poem, a speech, or a prayer: it is a great song of greeting and gratitude for all living beings. It has been recited collectively in the morning over centuries, in a territory that embraces part of the United States and Canada. It is also an inventory of the natural world, in which each element of the ecosystem is given thanks for its contribution to the prodigy of life. ## Fermentar

Fundamentos y técnicas de un arte milenario

Robert Ruiz Moreno

### Summary

Fermentation is, simply put, rotting something knowingly. It is a set of conservation methods in which microorganisms are involved. Even though humanity has used fermentation since the dawn of history, the vast potential of these techniques is yet to be discovered. Microorganisms preserve and change our perspective on food, giving it new colors, flavors, aromas and, ultimately, turning it into new "alive" foods, whose properties are beneficial to our body. This book offers a new theoretical framework, with its own classification system that covers all existing techniques. In addition, it resolves the usual doubts and errors and provides practical methods and 50 different recipes so that you can ferment at home.

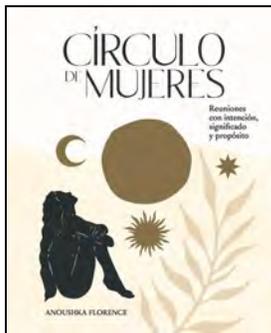

### Contributor Bio

**Robert Ruiz Moreno** worked for years as an itinerant chef in the most remote places on the planet. There he polished and shaped his fermented classification, which he would derive into his KamideDeus project. Robert is both director of the school and head of R&D at LOV ferments.

POR QUÉ EL PERDÓN ES NUESTRO MEJOR REGALO Y NUESTRA ÚNICA ESPERANZA. "Las formas creativas en que los seres humanos podemos lastimarnos unos a otros parecen no tener fin, como tampoco las razones de que creamos justificado hacerlo. Pero la capacidad humana para sanar tampoco tiene fin. Cada uno de nosotros posee una aptitud innata para extraer felicidad del sufrimiento, hallar esperanza en las situaciones más difíciles y curar toda relación necesitada de ello... El perdón es un viaje hacia la curación de nuestras heridas." DESMOND TUTU Y MPHÓ TUTU

*WHY FORGIVENESS IS OUR BEST GIFT AND OUR ONLY HOPE. "The creative ways in which we humans can hurt each other seem endless, and neither do the reasons we feel justified in doing so. But the human ability to heal is also endless. Each of us has an innate aptitude for drawing happiness from suffering, find hope in the most difficult situations and heal every relationship in need of it... Forgiveness is a journey towards healing our wounds." DES...*

### Los descubrimientos revolucionarios sobre el metabolismo, el peso y la salud

Herman Pontzer

#### Summary

Energy is the currency of life; without it, we die. And yet we continue to misunderstand how our metabolism works, and therefore we develop diets, exercise programs and strategies that end up failing in our attempts to lose weight. Drawing on his fieldwork with the Hadza of Tanzania and his study of primate evolution, Herman Pontzer explains how our bodies developed a great capacity to store energy to protect against periods of scarcity and famine. This book dives into how diet and physical activity affect our weight, and how our modern sedentary, overeating lifestyles have had disastrous consequences for our health. You'll never think about food and exercise the same way again.

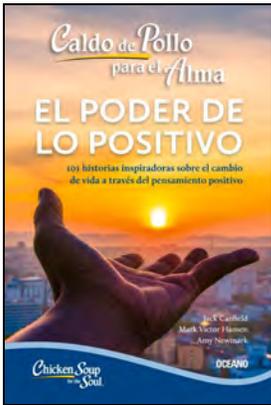

#### Contributor Bio

Herman Pontzer is an Associate Professor of evolutionary anthropology at Duke University and an Associate Research Professor of Global Health at the Duke Global Health Institute. He has dedicated himself to research on bioenergetics and human evolution. His investigations have been the subject of articles and reports in media outlets such as The New York Times, BBC, PBS, Washington Post, The Atlantic, NPR, Scientific American and many others.
